PROFESSIONAL SUMMARY

Computer Science Engineering graduate with completed 6-month AI Integrated MERN Stack internship. Experienced in developing responsive full-stack web applications using React.js, Node.js, Express.js, MongoDB, JavaScript, REST APIs, and JWT authentication. Strong foundation in frontend and backend development, database design, API integration, debugging, Git-based version control, and software engineering principles. Seeking opportunities as a Full Stack Developer, MERN Stack Developer, React Developer, Frontend Developer, Backend Developer, Web Developer, or Software Engineer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL, C

Frontend: React.js, HTML5, CSS3, React Router, React Hooks, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, CRUD Operations, Express Middleware

Database: MongoDB, MongoDB Atlas, Mongoose, MySQL

Authentication: JWT, bcrypt, Role-Based Access Control, CORS

Tools: Git, GitHub, Postman, Thunder Client, VS Code, npm, Vite

AI: TensorFlow, OpenCV, Machine Learning Fundamentals

EXPERIENCE

- AI Integrated MERN Stack Developer Intern** **2025–2026**
TechMaghi Pvt. Ltd., Kochi *6-Month Internship*
 - Developed full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
 - Designed RESTful APIs with CRUD operations and JWT authentication.
 - Integrated frontend applications with backend APIs and MongoDB.
 - Built reusable React components and responsive user interfaces.
 - Tested APIs using Postman and Thunder Client.
 - Managed source code using Git and GitHub.

PROJECTS

- Event Booking Platform | MERN Stack**
React.js, Node.js, Express.js, MongoDB, JWT, Stripe
 - Developed a full-stack event booking platform using the MERN stack with secure JWT-based user authentication and role-based access control.
 - Integrated Stripe Payment Gateway for secure online ticket booking and seamless payment processing.
 - Designed RESTful APIs and implemented CRUD operations for event, booking, and user management using MongoDB and Express.js.
- E-Commerce Web Application | MERN Stack**
Node.js, Express.js, MongoDB, JWT
 - Developed RESTful APIs for product, user, and order management using Node.js, Express.js, and MongoDB.
 - Implemented secure JWT-based authentication, role-based authorization, and protected API endpoints.
 - Designed a scalable backend architecture with CRUD operations and tested APIs using Postman.
- AI-Based Speed Regulation System**
Python, TensorFlow, OpenCV, Arduino
 - Developed an AI-based traffic sign detection system using TensorFlow and OpenCV for real-time road sign recognition.
 - Integrated Arduino to automatically regulate vehicle speed based on detected traffic signs.
 - Applied computer vision and machine learning techniques to improve road safety through intelligent speed control.

EDUCATION

- B.Tech in Computer Science and Engineering** **2021–2025**
Royal College of Engineering & Technology, Thrissur
APJ Abdul Kalam Technological University

ACHIEVEMENTS

- District-Level Winner and State-Level Qualifier – Young Innovators Programme (YIP) 2025.
- Presented an AI-based research project at the International Conference on Emerging Technology.
